

CARIS MTB™

MOLECULAR TUMOR BOARD

Providing Expert Interpretation and Therapeutic Guidance
Based on Molecular Profiling Data

Our Purpose

The Caris Molecular Tumor Board, powered by Caris Life Sciences®, provides oncologists with the opportunity to interact with leading cancer experts from across the country to obtain interpretation of molecular findings and therapeutic guidance for individual patients. This proprietary virtual tumor board platform is an innovative, real-time approach to deciphering complex data and treatment decisions on difficult-to-treat cases. The efficient access to cutting-edge information provided by the Caris Molecular Tumor Board allows oncologists to focus their efforts on what matters most – developing the most informed personalized treatment strategies for their patients.

Virtual Platform – Unlimited, on-demand access to the CMTB portal to track case progress

Expert Analysis – Each patient case submitted is personally evaluated and discussed by members of the Caris Molecular Tumor Board

Accelerated Review Time – Each case is typically reviewed within 10 days

Broad Review of Treatment Options – Recommendations, including FDA-approved treatments, clinical trials of matched targeted therapies, and additional tumor or germline testing options

How It Works

Case Submission
Clinical information and key questions submitted

Case Information
Patient case reviewed by MTB and uploaded

Case Opinion
Case assigned to board members for review

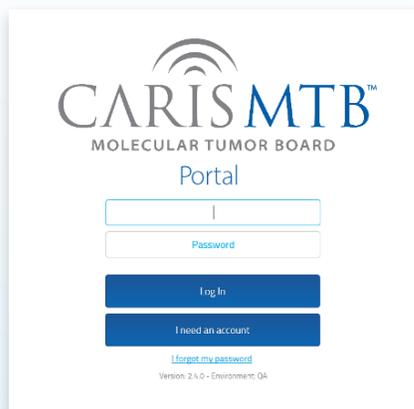

Report Generation
Board's comments and recommendation drafted and sent to clinician

Capture Information
Final submissions are stored to inform future recommendations

How to Submit a Case

- Visit **CarisLifeSciences.com/CMTB** and register for an account
- Select “new” to submit a case
- Provide patient name, dob, gender, diagnosis, Caris case number and a quick patient summary along with the question being asked of the board
- Upload recent medical note

Expert Board Members

Our panel of experts come from many of the leading cancer institutions in the world today to review every case and provide individualized diagnostic and therapeutic evaluations for each patient.

Our Board Members are from various institutions, including:

- **University of Alabama at Birmingham**
- **University of Arizona Cancer Center**
- **University of California San Francisco**
- **Fox Chase Cancer Center**
- **Karmanos Cancer Institute**
- **Levine Cancer Institute**
- **Sylvester Comprehensive Cancer Center at University of Miami**

The Caris Molecular Tumor Board provides oncologists with the opportunity to interact with cancer experts from across the country to review molecular information on their specific patient cases.

Please contact CMTB@CarisLS.com to register
and submit a case for review today.
